

Congratulations to Alexander Houghton and Joe Doubek for winning the running and walking trophies. Joe played on his age and injuries to influence my Computer to grant him an easy handicap. Modern computers cannot deal with the cunning of old codgers and was too kind. However Joe put a lot into his walking, we could see the sunlight flashing as it reflected off his furiously thrashing walking poles and, he did finish bathed in sweat. My Computer gave Alex, a previous winner, a really tough handicap but he had a cracking run. He was the only runner to beat his handicap time, so he deserved to win (*but watch out next year*). It was great to see a good turnout of the new Nomads, you did good times in the tough conditions. My Computer apologises for your handicaps being a bit tough but says it wasn't its fault as it lacked sufficient data. Don't be too discouraged as your times this year will be taken into account next year. This does not apply to the two Dereks. Your performances were totally crap but are recognised as a cry for sympathy and will be totally ignored.
